1. Description of the simulation

In this report, you will find an environment analysis for the location at Nieuwstraat 67, Aalst. This location is located in the shopping area Aalst City center and depicted below.

Locations of New locations Aalst

Based on the environment data we see that this location gets following scores:

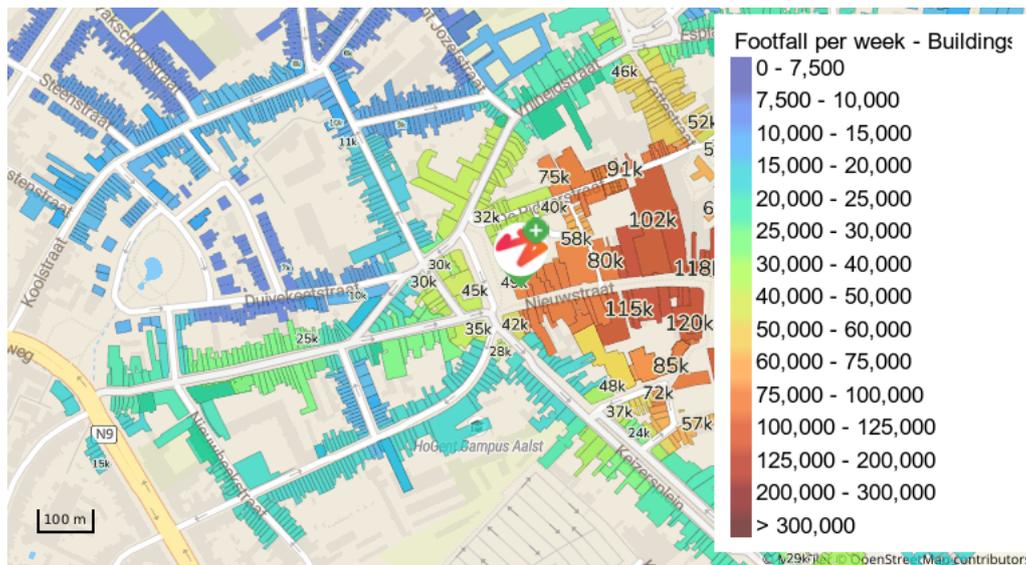

- **Footfall (outdoor):** ★★★★★☆ 96 %
- **Car passage:** ★★☆☆☆☆ 42 %
- **Local activity within 500m:** ★★★★★☆ 93 %
- **Shopping area attraction:** ★★★★★☆

In this report you can find more detailed statistics on the environment as well as an overview in the current retail mix and local needs of the environment.

2. Location quality

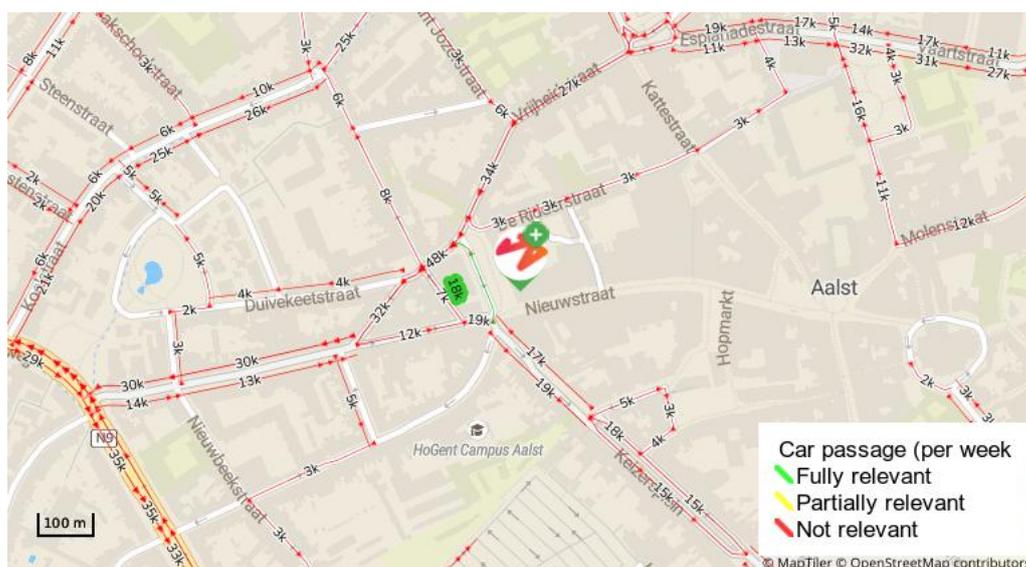

2.1 Footfall (outdoor)

Footfall includes the average number of pedestrians passing by the location per week. The location can capture **74.297 (outdoor) pedestrians per week** as shown below. This makes this location **★★★★★**-star location to attract shoppers from footfall. The map below shows the local footfall situation.

2.2 Car passage

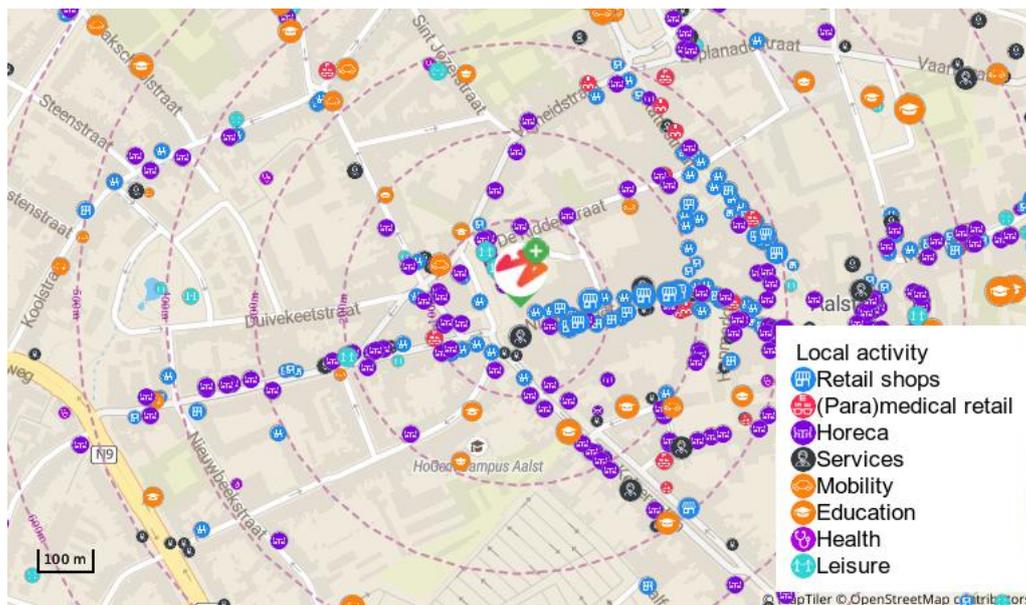

Car passage includes the average number of vehicles passing by the location per week. The location can capture **17.987 cars per week**. This makes this location a **★★★★★**-star location to attract shoppers from car passage. The map below shows the local car passage situation. In green you can find the most important road segments that have access to the location.

2.3 Synergies with local activity within 500m

Within a radius of 500m there are 8.659.566 destination visits per year. This makes this location a ★★★★★ -star location in terms of local activity.

Below we give an overview of the most important local activity in the environment. The extent to which this local activity brings synergies and cross visits depends on the number of visitors, the visitor profile and the visitor motives

Type: Retail shops	Address	Destination visits per year	Distance

3. Market space in the environment

The market space in the broader environment compares the market size in the environment with the current presence of stores and locations. In the following sections we give further insights in the data and the results per segment.

3.1. Market size in the environment

In the table below we give an overview of the most important potential indicators in an environment of 10, 15 and 20 minutes around the location.

Environment analysis	0~10 min by car	0~15 min by car	0~20 min by car
Socio-demographics			
Inhabitants (inh.)	42.584	94.097	182.324
Average age (year)	43	43	43
Households (hh.)	17.489	40.913	78.879
Wealth index	92 %	102 %	107 %
Urbanization (inh./sqkm)	2.560	1.372	957
Second residences	7 %	7 %	6 %
Rental houses	40 %	29 %	24 %
Garden size (m ²)	344	570	584
Other potential indicators			
Employment (fte)	15.243	28.845	43.510
Tourist visits per year	99.032	122.281	230.900

Ternat	535	1 %	16.568	32

4.4 Visit time

In the overview below you can see the average number of visits for each period in the week. It is important that these visits mainly take place during the opening hours.

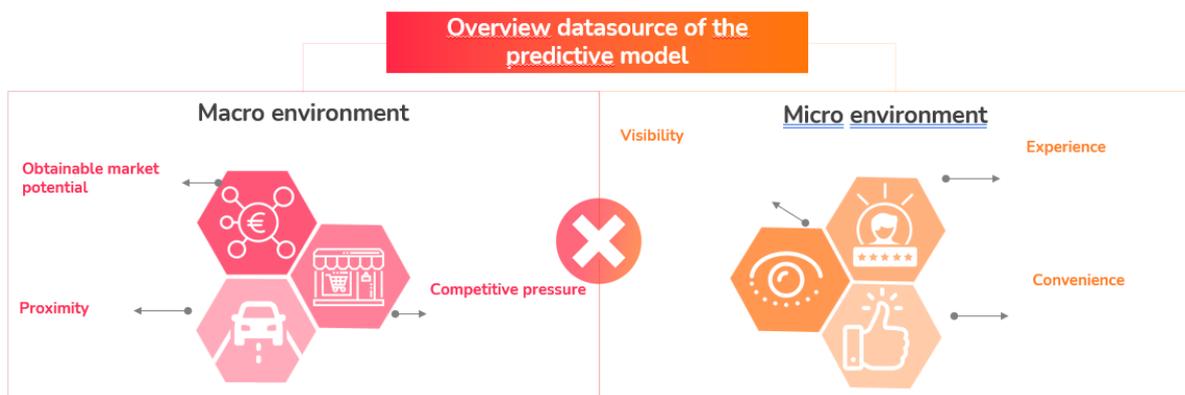

About RetailSonar

From location planning to location performance. RetailSonar is **Europe's leading geomarketing company**. We optimize the location strategy for over 200 retailers in more than 15 countries.

We make the difference thanks to:

- The most complete, innovative & up-to-date retail database in Europe
- Accurate sales forecasts thanks to state of the art Artificial Intelligence
- An international geomarketing platform for real estate, sales and marketing

To calculate the theoretical potential of a location, we analyze two geographic levels:

RetailSonar's predictive model combines these factors to produce a benchmark for expected Location turnover, helping businesses make informed decisions about Location locations, marketing strategies, and operational adjustments. By understanding the detailed dynamics of both the micro- and macro-environments, businesses can identify opportunities to improve Location performance and align resources effectively.

Our unique selling proposition lies in the precision of our data sources and analysis, offering insights that go beyond standard market assessments. Whether it's highlighting the impact of local competition or understanding customer travel patterns, our model provides a clear roadmap to unlocking each location's full potential.
